1	1	If $A = \{1,2,3,4,6\} amd\ B = \{2,3,4\}$ then which one of the following is correct?	B is a subset of A	1	A is a universal set	B is a subset of A	B is a superset of A	A is a null set		
1	2	What is value of $(A - B) \cup (B - A) \cup (A \cap B)$?	$A \cup B$	1	$A \cup B$	$A \cap B$	A	B		
1	3	What is the cardinality of the set of odd positive integers less than 10?	5	1	10	5	3	20		
1	4	The set O of odd positive integers less than 10 can be expressed by _____	{1, 3, 5, 7, 9}	1	{1, 2, 3}	{1, 3, 5, 7, 9}	{1, 2, 5, 9}	{1, 5, 7, 9, 11}		
1	5	If X and Y are two sets, such that $X \cup Y$ has 40 elements, X has 28 elements and Y has 22 elements. How many elements does $X \cap Y$ have?	10	1	30	20	10	5		
1	6	If set A contains 3 elements and another set B contains 6 elements then what is minimum number of elements that$(A \cup B)$ can have?	6	1	3	6	8	9		
1	7	The cardinality of the set of even positive integers less than 20 is_____?	9	1	8	10	9	12		
1	8	Let the players who play cricket be 12, the ones who play football 10, those who play only cricket are 6, then the number of players who play only football are _____, assuming there is a total of 16 players.	4	1	16	8	4	10		
1	9	In the given figure the if n(A)=20,n(U)=50,n(C)=10 and n(A∩B)=5 then n(B)=? 	35	1	35	20	30	10

1	58	In a class students undergoing a computer course the following were observed Out of a total 50 students: 30 know Web Designing, 18 know Tally 26 know Networking, 9 know both Web Designing and Tally, 16 know both Web Designing and Networking, 8 know both Tally and Networking, 47 know at least one of the three courses. From this we have to determine (a) How many students know none of these courses? (b) How many students know all three courses? (c) How many students know exactly one course?		4						
1	59	Consider a set of integers from 1 to 250. Find how many of these numbers are divisible by 3 or 5 or 7? Also, indicate how many are divisible by 3 or 5 but not 7?		3						
1	60	How many integers between 1 to 2000 are divisible by 2, 3, 5 or 7?		3						
1	61	Among 100 students, 32 study Maths, 20 study Physics, 45 study Biology, 15 study Maths and Biology, 7 study Maths and Physics, 10 study Physics and Biology and 30 do not study any of the three subjects. (a) Find the number of students studying all the three subjects? (b) Find the number of students studying exactly one of the three subjects?		4						
1	62	The 60,000 fans who attended the home coming football game bought up all the paraphernalia for their cars. Altogether 20,000 bumpers stickers, 36,000 window decals and 12000 key rings were sold. We know that 52,000 fans bought at least one item and no one bought more than one of a given item. Also 6000 fans bought both decals and key rings, 9000 bought both decals and bumpers stickers and 5000 bought both key rings and bumper stickers. a) How many fans bought all three items? b) How many fans bought exactly one item? (Only using Venn diagram) c) Someone questioned the accuracy of the total number of purchasers: 52000(given that all the other numbers have been confirmed to be correct.) This person claimed the total number of Purchasers to be either 60,000 or 44,000. How do you dispel the claim?		5

10	606	Let S_3 (the set of all permutations on three symbols 1, 2 & 3) is a finitenon-Abelian group with respect to composition of permutation and $f_1 = \begin{pmatrix}1 & 2 & 3\\ 1 & 3 & 2\end{pmatrix}, f_2 = \begin{pmatrix}1 & 2 & 3\\ 2 & 1 & 3\end{pmatrix}$, $f_3 = \begin{pmatrix}1 & 2 & 3\\ 2 & 3 & 1\end{pmatrix}, f_4 = \begin{pmatrix}1 & 2 & 3\\ 3 & 1 & 2\end{pmatrix}, f_5 = \begin{pmatrix}1 & 2 & 3\\ 3 & 2 & 1\end{pmatrix}, I = \begin{pmatrix}1 & 2 & 3\\ 1 & 2 & 3\end{pmatrix}$ then what is the value of $f_1(f_4 f_5) =$ _____ *and* $(f_2 f_3) f_5 =$ _____	I, I	1	f_2, I	f_2, f_3	I, I	I, f_2		
10	607	Show that $(Z_5 - \{0\}, X_5)$ is group.		4						
10	608	Show that the set of square roots of unity forms a group under multiplication.		4						
10	609	Show that the set of fourth roots of unity forms an Abelian group under multiplication.		4						
10	610	The algebraic structure (G,*) is $G = \{(a,b) / a,b \in R\}$ and * is a binary operation defined as $(a,b)*(c,d) = (ac, bc+d)$ for all $(a,b),(c,d) \in G$. Determine whether (G,*) is a Monoid or not. If yes then clearly specify the identity element.		3						
10	611	Let $*$ be a binary operation on set of real number R defined by a $*$ b = a + b + 2ab. Determine whether the set of real number R is a group or not with respect to given operation '*'.		3						
10	612	Let G={0,1,2,3,4,5} show that $(G, +_6)$ is an abelian group		4						
10	613	Check whether $(Z_8, +_8)$ is a group or not.		4

DM Practice Book_2024

unit	no	Question_text	Answer_text	mark	option1	option 2	option3	option4	option5	option 6
10	614	Check whether the set of non-zero complex numbers C_0 form an infinite abelian group or not with respect to multiplication composition.		4						
10	615	Prove that the set {0,1,2,3,4} is a finite abelian group under addition modulo 5 as binary operation.		3						
10	616	Show that the set of cube roots of unity forms a group under multiplication.		4						
10	617	find all the subgroups of $(Z_4, +_4)$		3						
10	618	Show that $H = \{loga : a \in Q, a > 0\}$ is a subgroup of $G = (R, +)$.		3						
10	619	Consider the group $< Z_4, +_4 >$. Check whether the following are subgroup of $< Z_4, +_4 >$ or not with valid reason. If yes, then prove that it is a subgroup of $< Z_4, +_4 >$. (a) $H_1 = \{0, 1\}$ (b) $H_2 = \{0, 2\}$ (c) $H_3 = \{0, 3\}$		4						
10	620	Show that (3Z, +) is a subgroup of (Z, +).		3						
10	621	Show that (Z_5, X_5) is a monoid but not group.		3

DM Practice Book_2024

unit	no	Question_text	Answer_text	mark	option1	option 2	option3	option4	option5	option 6
10	622	Show that the set of all positive rational number forms an abelian group under the composition defined by a * b = ab/2 .		5						
10	623	Show that S_2 (the set of all permutations on two symbols 1 & 2) is a group oforder 2 with respect to composition of permutation.		3						
10	624	Show that S_3 (the set of all permutations on three symbols 1, 2 & 3) is a finitenon-Abelian group of order 6 with respect to composition of permutation.		3						
10	625	Show that the set of rational numbers excluding zero is an Abelian group under multiplication. i.e., $(Q^*, \times)$ is an Abelian group.		3						
10	626	Show that $G = \{\begin{bmatrix} a & b \\ c & d \end{bmatrix} / a - cb \neq 0 \ \& \ a, b, c, d \in R\}$ is a group under matrixmultiplication.		5						
10	627	Show that G = $\left\{\begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix}, \begin{bmatrix} -1 & 0 \\ 0 & 1 \end{bmatrix}, \begin{bmatrix} 1 & 0 \\ 0 & -1 \end{bmatrix}, \begin{bmatrix} -1 & 0 \\ 0 & 1 \end{bmatrix}\right\}$ is an Abelian group under matrix multiplication.		5						
10	628	Show that integral multiplies of 5 generates a subgroup of additive group of integers.		5						
10	629	If G is the set of four special bilinear functions f_1, f_2, f_3, f_4 on the set of complex numbers defined by $f_1(z) = z, \quad f_2(z) = -z, \quad f_3(z) = \frac{1}{z}, \quad f_4(z) = -\frac{1}{z}$ then G forms a finite abelian group of order 4 with respect to composition known as composite of two functions.		3

unit	no	Question_text	Answer_text	mark	option1	option 2	option3	option4	option5	option 6
10	630	Let G={1,2,3,4,5,6} then show that (G,X_7) is an abelian group.		5						
10	631	Show that the set G = {a + b√2 /a, b ∈ Q} is a group with respect to addition.		4						
10	632	Show that $G = \{\begin{bmatrix} \cos a & -\sin a \\ \sin a & cos\ a \end{bmatrix} / a \in R\}$ is a group under matrix multiplication.		5						
10	633	R={0°, 60°, 120°, 180°, 240°, 300°}. a*b= overall angular rotation corresponding to successive rotation a and then by b. Show that (R, *) is group.		5
